Subject Index of Volume 183

Aging
  fatigue crack propagation mechanisms in a thermally aged duplex stainless steel, 91
  microstructure and coarsening kinetics of Ni_3Ge precipitates in aged Ni–Ge alloys, 169
Alloys
  characterization of deformation and fracture behavior in amorphous and/or ceramic coatings and aluminum alloy substrate by small punch testing and acoustic emission techniques, 121
  combustion synthesis of $MoSi_2$–WSi_2 alloys, 205
  effect of Ni content on the microstructure, microhardness and fracture toughness of magnesium silicide ternary alloy, 145
  laser surface alloying of stainless steel with silicon nitride, 239
  mechanical alloying of ceramics in zirconia–ceria system, L9
  microstructure and coarsening kinetics of Ni_3Ge precipitates in aged Ni–Ge alloys, 169
  tensile and elastic properties of deformed heterogeneous aluminum alloys at room and elevated temperatures, L1
  γ Phase and Ni_2Cr-type long-range order in Ni-rich Ni–Cr–Mo alloys, 103
Aluminium
  aluminium/Ni_3Al composites processed by powder metallurgy, L5
  characterization of deformation and fracture behavior in amorphous and/or ceramic coatings and aluminum alloy substrate by small punch testing and acoustic emission techniques, 121
  effect of liquation on welding of a continuous cast sheet of an Ni_3Al alloy containing Zr, 131
  effect of secondary phase on sialon–steel chemical interaction, L19
  effects of layer thickness on impact toughness of Al/Al–SiC_p laminates, 59
  influence of SiC particle volume fraction on the compressive behaviour of partially remelted Al–Si-based composites, 157
  on crystallographic crack transfer across interfaces in four types of aluminum bicrystal, 23
  particle size, volume fraction and matrix strength effects on fatigue behavior and particle fracture in 2124 aluminum–SiC_p composites, 69
  phase transformations in XDTM TiB_2 reinforced near-γ Ti–48Al–2Nb–2Mn, 181
  rheological behaviour of partially solidified aluminium matrix composites, 247
  tensile and elastic properties of deformed heterogeneous aluminum alloys at room and elevated temperatures, L1
  the isothermal compression response of a near γ-TiAl + W intermetallic, 211
  thermal residual stresses and mechanical behavior of cast SiC/Al composites, 39
Austenite
  the core structure of $\langle a/2\rangle\langle 110\rangle$ screw dislocations in Fe–Ni–Cr–N austenite, 223

Bauschinger effect
  the Bauschinger effect in compression–tension of sheet metals, 31
Boron
  phase transformations in XDTM TiB_2 reinforced near-γ Ti–48Al–2Nb–2Mn, 181
  synthesis of TiB_2 in liquid copper, 139

Carbon
  cast microstructure and tribological properties of particulate TiC-reinforced Ni-base or stainless steel matrix composites, 195
  effects of layer thickness on impact toughness of Al/Al-SiC_p laminates, 59
  influence of SiC particle volume fraction on the compressive behaviour of partially remelted Al–Si-based composites, 157
  particle size, volume fraction and matrix strength effects on fatigue behavior and particle fracture in 2124 aluminum–SiC_p composites, 69
  thermal residual stresses and mechanical behavior of cast SiC/Al composites, 39
Casting
  effect of liquation on welding of a continuous cast sheet of an Ni_3Al alloy containing Zr, 131
Ceramics
  characterization of deformation and fracture behavior in amorphous and/or ceramic coatings and aluminum alloy substrate by small punch testing and acoustic emission techniques, 121
  mechanical alloying of ceramics in zirconia–ceria system, L9
Chromium
  high temperature creep behaviour of a 15M_2B–Fe–18Cr–12Ni composite, 11
  investigation of the effects of matrix microstructure and interfacial properties on the fatigue and fracture behavior of a Ti–15V–3Cr–3Al–3Sn/SCS9 composite, 49
  the core structure of $\langle a/2\rangle\langle 110\rangle$ screw dislocations in Fe–Ni–Cr–N austenite, 223
  γ phase and Ni_2Cr-type long-range order in Ni-rich Ni–Cr–Mo alloys, 103
Coarsening
  microstructure and coarsening kinetics of Ni_3Ge precipitates in aged Ni–Ge alloys, 169
Coatings
  characterization of deformation and fracture behavior in amorphous and/or ceramic coatings and aluminum alloy substrate by small punch testing and acoustic emission techniques, 121
Combustion
  combustion synthesis of $MoSi_2$–WSi_2 alloys, 205
Composites
  aluminium/Ni_3Al composites processed by powder metallurgy, L5
  finite element modelling of residual stresses and strength differential effect in discontinuously reinforced metal matrix composites, 111
  high temperature creep behaviour of a 15M_2B–Fe–18Cr–12Ni composite, 11
  influence of SiC particle volume fraction on the compressive behaviour of partially remelted Al–Si-baed composites, 157

particle size, volume fraction and matrix strength effects on fatigue behavior and particle fracture in 2124 aluminum-SiC_p composites, 69
rheological behaviour of partially solidified aluminium matrix composites, 247
the effect of fiber orientation on fatigue crack propagation in SCS-6/Ti-15-3 composites, 1
thermal residual stresses and mechanical behavior of cast SiC/Al composites, 39
Composites
cast microstructure and tribological properties of particulate TiC-reinforced Ni-base or stainless steel matrix composites, 195
Compression
influence of SiC particle volume fraction on the compressive behaviour of partially remelted Al–Si-based composites, 157
the Bauschinger effect in compression-tension of sheet metals, 31
Copper
synthesis of TiB_2 in liquid copper, 139
Cracking
fatigue crack propagation mechanisms in a thermally aged duplex stainless steel, 91
on crystallographic crack transfer across interfaces in four types of aluminum bicrystal, 23
the effect of fiber orientation on fatigue crack propagation in SCS-6/Ti-15-3 composites, 1
Creep
Harper–Dorn creep in olivine, 267
high temperature creep behaviour of a $15M_2B$–Fe–18Cr–12Ni composite, 11
the effect of grain boundary precipitates on the creep behaviour of Inconel 718, 81
Crystals
cyclic stress–strain response of alpha brass single crystals oriented for easy glide, L13
on crystallographic crack transfer across interfaces in four types of aluminum bicrystal, 23
relation of friction and wear to processing parameters of polycrystalline diamond films grown on silicon and silica substrates by the hot filament method, 257

Deformation
characterization of deformation and fracture behavior in amorphous and/or ceramic coatings and aluminum alloy substrate by small punch testing and acoustic emission techniques, 121
tensile and elastic properties of deformed heterogeneous aluminum alloys at room and elevated temperatures, L1
Diamond films
relation of friction and wear to processing parameters of polycrystalline diamond films grown on silicon and silica substrates by the hot filament method, 257
Dislocation
the core structure of $(a/2)\langle 110\rangle$ screw dislocations in Fe–Ni–Cr–N austenite, 223

Elastic properties
tensile and elastic properties of deformed heterogeneous aluminum alloys at room and elevated temperatures, L1

Fatigue
fatigue crack propagation mechanisms in a thermally aged duplex stainless steel, 91
investigation of the effects of matrix microstructure and interfacial properties on the fatigue and fracture behavior of a Ti–15V–3Cr–3Al–3Sn/SCS9 composite, 49
particle size, volume fraction and matrix strength effects on fatigue behavior and particle fracture in 2124 aluminum–SiC_p composites, 69
the effect of fiber orientation on fatigue crack propagation in SCS-6/Ti-15-3 composites, 1
Fibres
the effect of fiber orientation on fatigue crack propagation in SCS-6/Ti-15-3 composites, 1
Finite element modelling
finite element modelling of residual stresses and strength differential effect in discontinuously reinforced metal matrix composites, 111
Fracture
characterization of deformation and fracture behavior in amorphous and/or ceramic coatings and aluminum alloy substrate by small punch testing and acoustic emission techniques, 121
effect of Ni content on the microstructure, microhardness and fracture toughness of magnesium silicide ternary alloy, 145
investigation of the effects of matrix microstructure and interfacial properties on the fatigue and fracture behavior of a Ti–15V–3Cr–3Al–3Sn/SCS9 composite, 49
particle size, volume fraction and matrix strength effects on fatigue behavior and particle fracture in 2124 aluminum–SiC_p composites, 69
Friction
relation of friction and wear to processing parameters of polycrystalline diamond films grown on silicon and silica substrates by the hot filament method, 257

Germanium
microstructure and coarsening kinetics of Ni_3Ge precipitates in aged Ni–Ge alloys, 169
Grain boundaries
the effect of grain boundary precipitates on the creep behavior of Inconel 718, 81
Growth rates
effect of local solidification time on the dendrite-to-cell transition at growth rates, 233

Hot filament method
relation of friction and wear to processing parameters of polycrystalline diamond films grown on silicon and silica substrates by the hot filament method, 257

Impact
effects of layer thickness on impact toughness of Al/Al–SiC_p laminates, 59
Interfaces
investigation of the effects of matrix microstructure and interfacial properties on the fatigue and fracture behavior of a Ti–15V–3Cr–3Al–3Sn/SCS9 composite, 49
on crystallographic crack transfer across interfaces in four types of aluminum bicrystal, 23
Intermetallics
the isothermal compression response of a near γ-TiAl + W intermetallic, 211
Iron
high temperature creep behaviour of a 15 M_2B–Fe–18Cr–12Ni composite, 11
the core structure of $(a/2)\langle 110\rangle$ screw dislocations in Fe–Ni–Cr–N austenite, 223

Laminates
effects of layer thickness on impact toughness of Al/Al–SiC_p laminates, 59
Lasers
laser surface alloying of stainless steel with silicon nitride, 239
Liquation
effect of liquation on welding of a continuous cast sheet of an Ni_3Al alloy containing Zr, 131

Magnesium
effect of Ni content on the microstructure, microhardness and fracture toughness of magnesium silicide ternary alloy, 145
Manganese
phase transformations in XD™ TiB_2 reinforced near-γ Ti–48Al–2Nb–2Mn, 181
Metallurgy
aluminium/Ni_3Al composites processed by powder metallurgy, L5
Metals
finite element modelling of residual stresses and strength differential effect in discontinuously reinforced metal matrix composites, 111
the Bauschinger effect in compression–tension of sheet metals, 31
Molybdenum
combustion synthesis of $MoSi_2$–WSi_2 alloys, 205
γ phase and Ni_2Cr-type long-range order in Ni-rich Ni–Cr–Mo alloys, 103

Nickel
aluminium/Ni_3Al composites processed by powder metallurgy, L5
cast microstructure and tribological properties of particulate TiC-reinforced Ni-base or stainless steel matrix composites, 195
effect of liquation on welding of a continuous cast sheet of an Ni_3Al alloy containing Zr, 131
effect of Ni content on the microstructure, microhardness and fracture toughness of magnesium silicide ternary alloy, 145
high temperature creep behaviour of a 15M_2B–Fe–18Cr–12Ni composite, 11
laser surface alloying of stainless steel with silicon nitride, 239
microstructure and coarsening kinetics of Ni_3Ge precipitates in aged Ni–Ge alloys, 169
the core structure of $\langle a/2\rangle\langle 110\rangle$ screw dislocations in Fe–Ni–Cr–N austenite, 223
γ phase and Ni_2Cr-type long-range order in Ni-rich Ni–Cr–Mo alloys, 103
Niobium
phase transformations in XD™ TiB_2 reinforced near-γ Ti–48Al–2Nb–2Mn, 181
Nitrogen
effect of secondary phase on sialon–steel chemical interaction, L19
the core structure of $\langle a/2\rangle\langle 110\rangle$ screw dislocations in Fe–Ni–Cr–N austenite, 223

Olivine
Harper–Dorn creep in olivine, 267
Oxygen
effect of secondary phase on sialon–steel chemical interaction, L19

Phase transformations
phase transformations in XD™ TiB_2 reinforced near-γ Ti–48Al–2Nb–2Mn, 181
Powders
aluminium/Ni_3Al composites processed by powder metallurgy, L5
Precipitates
microstructure and coarsening kinetics of Ni_3Ge precipitates in aged Ni–Ge alloys, 169
the effect of grain boundary precipitates on the creep behavior of Inconel 718, 81

Silicon
combustion synthesis of $MoSi_2$–WSi_2 alloys, 205
effect of Ni content on the microstructure, microhardness and fracture toughness of magnesium silicide ternary alloy, 145
effect of secondary phase on sialon–steel chemical interaction, L19
effects of layer thickness on impact toughness of Al/Al–SiC_p laminates, 59
influence of SiC particle volume fraction on the compressive behaviour of partially remelted Al–Si-based composites, 157
laser surface alloying of stainless steel with silicon nitride, 239
particle size, volume fraction and matrix strength effects on fatigue behavior and particle fracture in 2124 aluminum–SiC_p composites, 69
relation of friction and wear to processing parameters of polycrystalline diamond films grown on silicon and silica substrates by the hot filament method, 257
thermal residual stresses and mechanical behavior of cast SiC/Al composites, 39
Solidification
effect of local solidification time on the dendrite-to-cell transition at growth rates, 233
rheological behaviour of partially solidified aluminium matrix composites, 247
Steels
cast microstructure and tribological properties of particulate TiC-reinforced Ni-base or stainless steel matrix composites, 195
fatigue crack propagation mechanisms in a thermally aged duplex stainless steel, 91
Strain
cyclic stress–strain response of alpha brass single crystals oriented for easy glide, L13
Stress
cyclic stress–strain response of alpha brass single crystals oriented for easy glide, L13
finite element modelling of residual stresses and strength differential effect in discontinuously reinforced metal matrix composites, 111
thermal residual stresses and mechanical behavior of cast SiC/Al composites, 39

Tensile properties
tensile and elastic properties of deformed heterogeneous aluminum alloys at room and elevated temperatures, L1
Tension
the Bauschinger effect in compression–tension of sheet metals, 31
Titanium
cast microstructure and tribological properties of particulate TiC-reinforced Ni-base or stainless steel matrix composites, 195
investigation of the effects of matrix microstructure and interfacial properties on the fatigue and fracture behavior of a Ti–15V–3Cr–3Al–3Sn/SCS9 composite, 49

phase transformations in XD™ TiB_2 reinforced near-γ Ti–48Al–2Nb–2Mn, 181
synthesis of TiB_2 in liquid copper, 139
the effect of fiber orientation on fatigue crack propagation in SCS-6/Ti-15-3 composites, 1
the isothermal compression response of a near γ-TiAl + W intermetallic, 211
Toughness
effects of layer thickness on impact toughness of Al/Al–SiC_p laminates, 59
Tungsten
combustion synthesis of $MoSi_2$–WSi_2 alloys, 205
the isothermal compression response of a near γ-TiAl + W intermetallic, 211
Vanadium
investigation of the effects of matrix microstructure and interfacial properties on the fatigue and fracture behavior of a Ti–15V–3Cr–3Al–3Sn/SCS9 composite, 49
Wear
relation of friction and wear to processing parameters of polycrystalline diamond films grown on silicon and silica substrates by the hot filament method, 257
Welding
effect of liquation on welding of a continuous cast sheet of an Ni_3Al alloy containing Zr, 131
Zirconium
effect of liquation on welding of a continuous cast sheet of an Ni_3Al alloy containing Zr, 131
mechanical alloying of ceramics in zirconia–ceria system, L9
